OFFICIAL CATALOGUE

1900

INTRODUCTORY...

THE popularity of our previously issued Catalogues made demands upon us far in excess of the supply. We therefore take especial pleasure in presenting to you our complete Catalogue for 1900. Appreciating the value of your time, care has been taken to number the cuts consecutively and to index and classify the contents for quick reference. We will be pleased to make quotations on any thing in our line shown in other books or from architects' details.

Very truly yours,

HUTTIG BROS. MFG. CO.

Muscatine, Ia., March 1, 1900.

GRADES OF

SASH, DOORS and BLINDS

Adopted by the Wholesale Sash, Door and Blind Manufacturers' Association of the Northwest, February 1, 1898.

DOORS

No. 1 Doors.—Material in No. 1 Doors must be clear, with exception that water stain and white sap and small pin knots, not exceeding one-fourth inch in diameter may be admitted. Workmanship must be good. The Standard No. 1 Door may be glued, wedged, and pinned, or glued tenons without pins.

No. 2 Doors.—Material in No. 2 Doors may contain knots not to exeeed three-quarters inch in diameter, and blue sap showing on both sides not to exceed fifty per cent. in any one piece of the door, and gum spots showing on one side only, and other slight defects, but the total number of defects (not including blue sap) shall not exceed ten in number on each side. Slight defects in workmanship admitted.

No. 3 Doors.—Material in No. 3 Doors may contain stained sap and knots not exceeding one and one-half inches in diameter, also small worm holes showing on one side only, and slight streaks of fine shake. Fifteen defects other than sap stains and worm holes on each side may be allowed, also slight defects in workmanship. Panels made of woods other than white pine are permitted.

WINDOWS

Check Rail Windows may contain not to exceed two knots in eaeh piece of the sash, said knots not to exceed three-eighths inch in diameter. White sap and a small amount of blue sap may be admitted. Workmanship must be good.

Plain Rail Windows and Sash may contain blue sap and (small) knots.

BLINDS

Outside Blinds must be made of clear lumber, exeept that small sound pin knots and white sap may be admitted. Workmanship must be good.

Order by Number Only.

WE ASSUME THAT THE NUMBERS OF DESIGNS IN ORDERS OR BILLS FOR ESTIMATE SENT US, REFER TO THIS CATALOGUE UNLESS OTHERWISE SPECIFIED.

Do Not Cut This Book.

Directions for Ordering.

Much valuable time can be saved in closely following these instructions:

Be explicit—**do not assume that we know what is wanted.**

Always give width first in specifying sizes; *this applies to everything.*

Orders for sash should state number of lights in window, size of glass, thickness, whether plain or check rail, glazed or open. If glazed, state single or double strength glass: if not stated, we will glaze single strength. For segment top windows always give the radius of the segment, otherwise we will make the regular radius, which is the width of the opening. For circle head and segment head windows, always state whether they are wanted to finish circle or segment inside and outside, like plans 1 and 3, on page 16, or to finish circle or segment on outside only, like plans 2 and 4 on same page; also, where frames are made, we should have width and height inside of the frame in the clear. If no measurements are given, we will always make windows to correspond with size of windows as given in this list.

In every case where our regular sizes and styles are not used, please specify the openings to fill, in addition to giving number of lights, glass size, and furnish complete description.

Orders for doors should state size, thickness, number of panels, and quality: if moulded, say if one or more sides; flush or raised moulding. To patterns in this or other catalogues, refer by number. **If design is taken from any other catalogue, state from whose book it is taken, and the date of issue.**

Orders for outside blinds should state number of lights in window, size of glass, thickness of blinds, stationary or rolling slats; if for segment or circle head windows, give radius.

Doors, blinds and sash are often ordered 1¼, 1½ and 2 inches thick. **Do not use these terms, as it only delays orders.** The regular thicknesses are 1⅛, 1⅜ and 1¾ inches. We can make them 1¼, 1½ and 2 inches, at extra price.

Orders for inside blinds should state *exact size* of opening (outside measure) and thickness, the number of folds, and if panels or slats, and where blinds are to be cut. If of patterns shown on page 52, refer by number, or make a sketch if special.

Orders for outside door frames should state whether for a frame or brick building, also width and thickness of jambs, and whether made with rabbet or stop.

Orders for window frames, other than box frames, should state if for plain or check rail sash, with or without pulleys, giving width of jambs. For inside door jambs, give the width and thickness of the jamb, and whether with rabbet or stop. Window frames and inside door jambs are always furnished *without* stops, unless otherwise ordered.

Orders for mouldings should give plainly the number of the moulding and wood desired. If special moulding, give exact detail or sketch.

Refer by number in catalogues, or send sketches, as far as possible, of anything other than shown in this or other books.

CIRCLE AND SEGMENT TOP WINDOWS

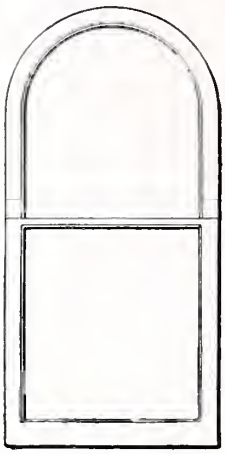

FIG. 1

CIRCLE INSIDE AND OUTSIDE

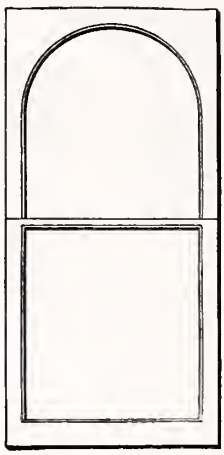

FIG. 2

CIRCLE OUTSIDE, SQUARE INSIDE

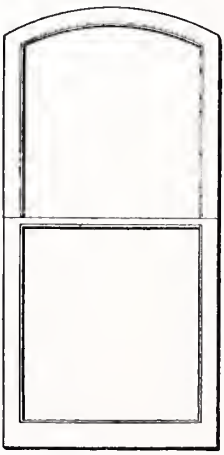

FIG. 3

SEGMENT INSIDE AND OUTSIDE

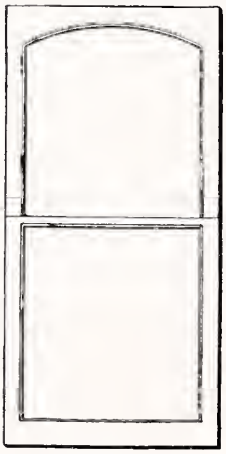

FIG. 4

SEGMENT OUTSIDE, SQUARE INSIDE

Windows made in the above styles can be filled with any number of lights required.

N. B.—A window indicates two pieces. A sash indicates one piece. A pair of blinds indicates two pieces. A blind indicates one piece. A set of sash or blinds indicates more than two pieces, and order should be accompanied with sketch.

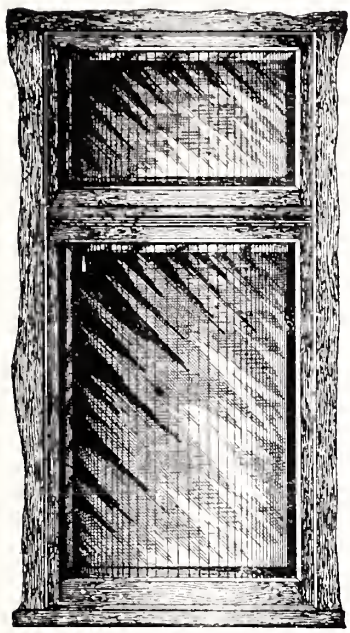
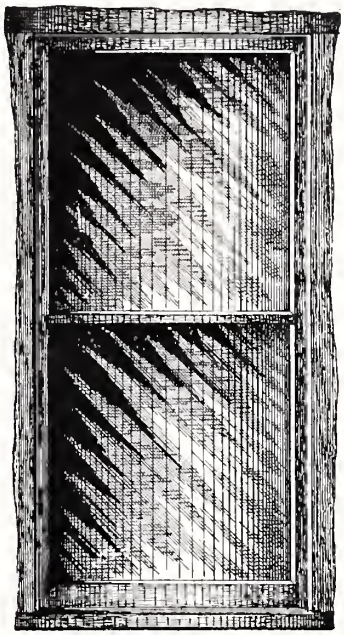
BENT OR BOW WINDOWS



R 185

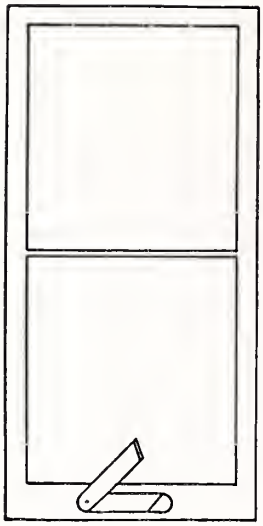


R 185½

We manufacture bent windows (glazed with window, plate or art glass), at moderate prices. In ordering, give radius to outside of top sash and exact width straight across between jambs. If jambs are NOT parallel, a plan of sill is necessary.

For church windows, see pages 251 to 258.

STORM SASH



TWO-LIGHT
VENTILATOR OPEN

Size of openings, same as blinds.

We can make one or more Ventilators in bottom rail of sash, as shown in cuts.

If ventilators are wanted order must so state.

$1\frac{1}{8}$ inch Storm Sash, same price as $1\frac{3}{8}$-inch Check Rail Windows. Same opening.

$1\frac{3}{8}$-inch Storm Sash, add 15 per cent to $1\frac{3}{8}$ Check Rail open list.

For Ventilators in top or bottom rail, add 10 cents each net.

For Swing Light, add 40 cents each net.

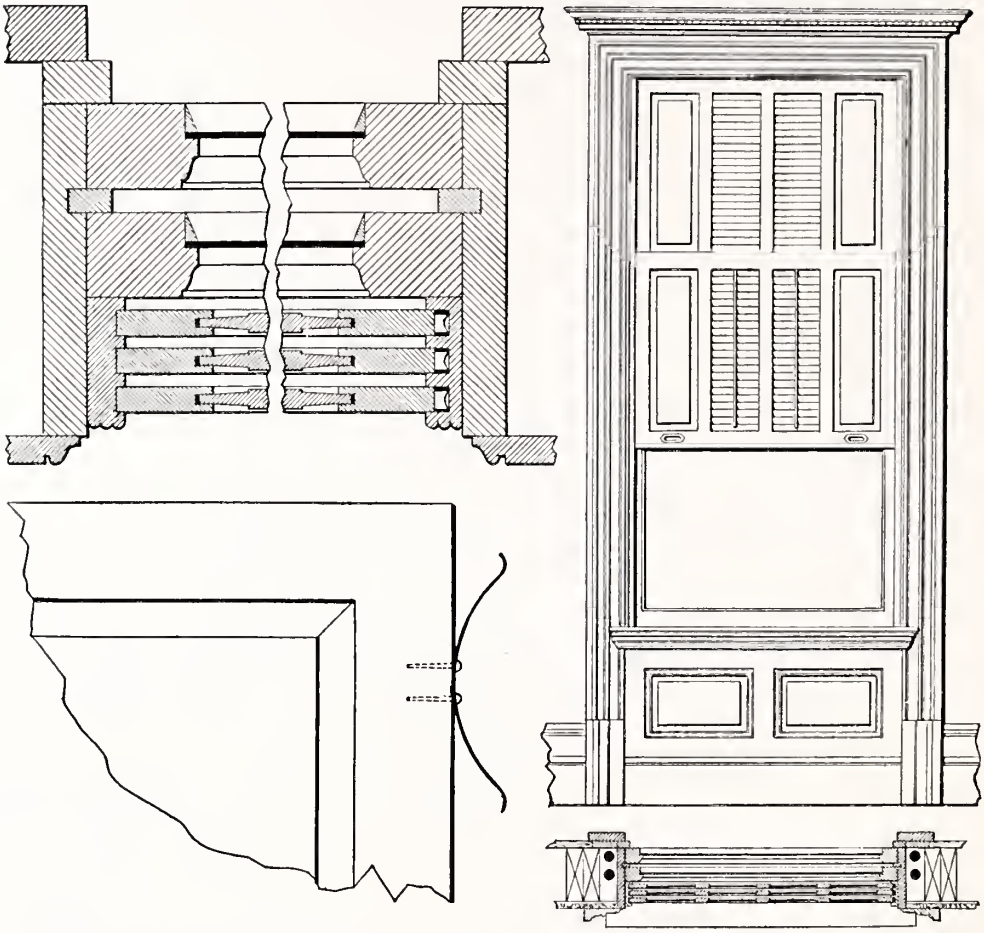
No. 22. All Door Blinds are made in pairs and rabbeted, same as Window Blinds, unless otherwise ordered.

HILL'S PATENT SLIDING BLINDS



Above section shows that no special frame is required to use our sliding blinds. The guideway is fastened on pulley stile, acting as a stop for the sash.

These sliding blinds are made ½-inch in thickness, and though constructed of light material possess great strength and lasting qualities.

Can be closed with the window raised and cannot blow open or rattle, thus giving the best medium of ventilation.

They do not interfere with curtains or window ornaments, and admit light and air from any part of the window.

These blinds are specially made to order in the white or finished complete; either varnished in the natural colors of the different woods or stained and varnished, or wood filled and cabinet or rubbed finish. All trimmings and hardware we furnish, which is included in the price of blinds given on page 55.

Extra Heavy Lifts, Bronze or Old Copper (put on with screws).....10c each.
Drop Pulls, Bronze or Old Copper .....15c "
Concealed Metal Operator, per division.....12c "

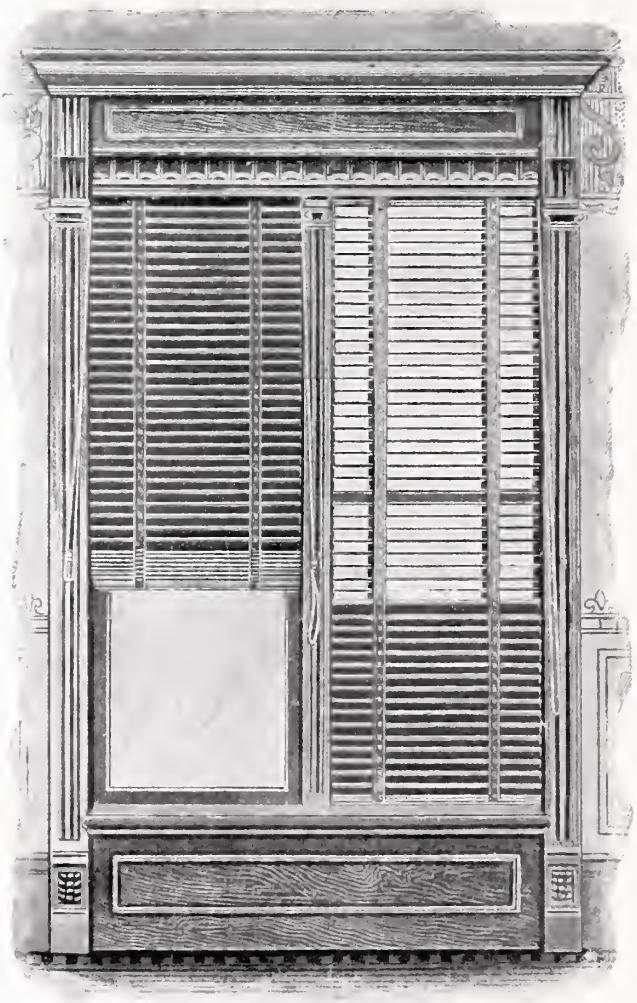
PLEASE NOTE—That above list prices include all necessary Hardware or Trimming, and in comparing cost with folding blinds or other makes of sliding blinds, this should be taken into consideration. **Above Prices Subject to Discount.**

Will make net estimates on weighted blinds or on special designs from architects' details.

DIRECTIONS FOR ORDERING

Give the exact measurement of the opening which the blinds are to fill. Where guideways take the place of stops, state distance from face of casing to inner face of lower sash. If windows are circle head or segment inside, send exact pattern or give radius. Full information for adjusting these blinds accompany each order.

VENETIAN BLINDS



Above cut shows the blinds as used in a DOUBLE or Mullion Window.

In the left-hand window the blind is partly raised, the slats being arranged to exclude the light. In the right-hand window the blind is lowered, with the upper slats arranged to admit light, and the lower ones to exclude it. In the blind each slat is independent in its action, consequently any number of slats can be closed or left open at will and in any desired part of the blind. The control of light and air is therefore practically absolute in these blinds.

MEASUREMENTS

Give exact measure, width and height of the opening in which the blind is to hang.

LIST PRICES—VENETIAN BLINDS

CLASSIFICATION OF WOODS.	Price per Square Foot.	
	2 3-8 inch Slats.	2 inch Slats.
	$ cts.	$ cts.

ON the following page we show reproductions of various hardwoods that are commonly used in interior finishing. These samples will convey to your customers an idea of the grain and color of these woods when properly filled and varnished. Birch can be stained to imitate cherry or mahogany, and makes a fine substitute at moderate cost.

HARDWOODS FOR INTERIOR FINISH.

PLAIN RED OAK.

QUARTERED SYCAMORE.

BIRD'S EYE MAPLE.

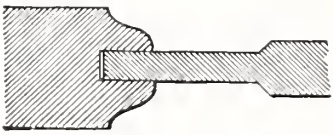
QUARTERED RED OAK.

RED BIRCH

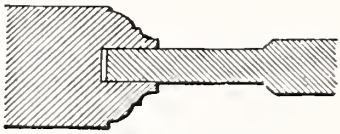
MAHOGANY.

Do not cut Page.

DOOR STICKINGS.

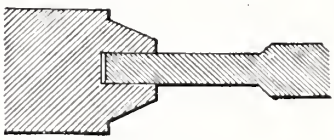


O. G.

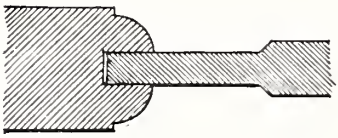


BEAD AND COVE.

The above styles are standard, O. G. being the sticking of all stock goods.



P. G.

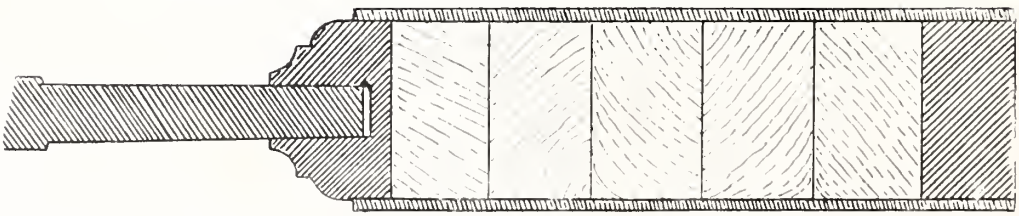


OVOLO.

P. G. and Ovolo stickings are special, but take same price as bead and cove doors.

VENEERED DOORS.

Our veneered doors are made of selected kiln-dried stock, by skilled workmen. Send us your order and get the best goods at competitive prices.



SECTION OF SOLID MOULDED VENEERED DOOR.

Made in any wood.

DIRECTIONS NECESSARY FOR ORDERING STAIRS AND STAIR RAILINGS

When a flight of stairs is wanted, we should know the height of story from floor to floor, width of joists in second story, width and run of stairs, the size of cylinder, style of base used in the hall, with rough sketch showing about the shape of stairs wanted.

FOR STAIR RAILING—STRAIGHT FLIGHT

We require the width of rise and step as sawed out on string board, the number of risers, the size of cylinder from face to face of string or face board, which way it turns at head of stairs, and the number of feet of straight rail required at landing. Unless we receive plan showing otherwise, we always suppose the top riser for a straight flight of stairs to be placed at the edge of spring or cylinder.

FOR CIRCULAR OR WINDING STAIRS

We should have an exact plan of stairs as built, giving the width of rise and step, the location of risers in cylinder, etc.; and, when there are straight steps below or above the cylinder, always give the distance from the first square riser to the edge of spring line of cylinder, on the face of string or face board. *Always write your address in full on the plans.*

Hardwood Mantels.

ON the following pages is shown a new and elegant line of best manufacture, at very low prices. The designs are varied, offering an assortment suitable for any class of buildings. At prices quoted we send mantels complete as shown in cuts, excepting the thirty necessary fire brick, which can be purchased of your local dealer at less than freight alone from Chicago. Mantels of either plain or quarter-sawed oak are standard and can be had in natural or antique finish. Will be pleased to quote you on any other hardwood or in white and gold, upon request. The tiling can be furnished in a large variety of colors. If selection of color is left to us we send that best in harmony with the woodwork ordered. Several styles of tiling are shown, but unless advised to the contrary, will ship the Roman tile, as shown in design R 1759, as it is latest and most satisfactory. All our mantels have adjustable wall plates to fit any chimney 4 feet 10 inches to 5 feet 4 inches wide. When ordering give width of chimney breast and kind of wood. All goods are securely boxed and shipped in first-class order, ready to set in building.

Church Furniture

WE MANUFACTURE this class of work in the very best manner, finished in hard oil ready to set in place at building.

When an estimate on pews is required, always send floor plan or pencil sketch, showing the number, length and arrangement of pews on the floor. An intelligent estimate cannot be given without this information.

Give the kind of wood you wish to use.

Mention the style of body you would like, as shown by sections on Page 262.

Style A, straight back, flat seat.

Style C, curved back, curved seat.

Standard height of back from seat, 20 inches.

Standard width of seat, 14½ to 15 inches.

Height of seat from floor at front edge, 16½ inches, and 2 inches lower when cushions are to be used.

Pitch of seat, front to rear, 1½ inches.

Spacing on floor, 32 inches from back to back.

We invite correspondence and will be pleased to quote prices at any time.

Polished Plate Glass

ODD and fractional parts of inches are charged at the price of the next highest even number. Irregular shaped glass, or glass cut to pattern, will be charged as it squares. No special thickness guaranteed; but when heavy plate is required, and so ordered, care will be exercised in selecting the heaviest in stock at the time.

Discounts apply to "glazing quality" only, and to glass of ordinary thickness. Selected glass and special thickness, charged at special prices.

Glass exceeding the sizes comprised in the tables will be furnished at special prices.

On all orders amounting to less than $100 net, or for less than three plates of whatever value, boxing will be charged at the rate of 6 cents per square foot lid measurement. Said measurement to be six inches larger each way than the widest and the longest plates in the case.

TO APPROXIMATE WEIGHT OF POLISHED PLATE GLASS BOXED.

Extend the glass at 3½ lbs. per square foot. Weight of box equals the contents of a plate of greatest width and length of those packed therein multiplied by 10. Thus:

1 plate 36 in. x 96 in. 1 " 60 in. x 84 in.	=59 ft. x 3½	206½ lbs.
Size of box 60 in. x 96 in	=40 ft. x 10	400
		606½ lbs.

POLISHED PLATE GLASS.

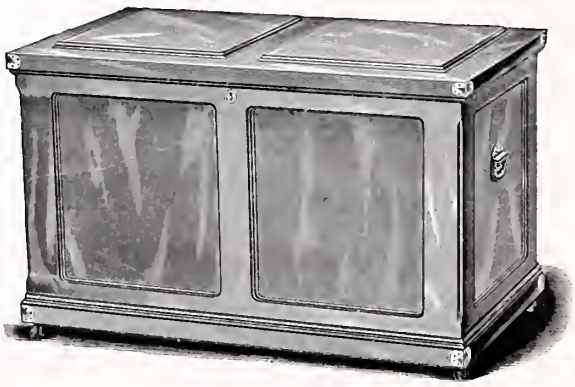
CEDAR CHESTS



Our moth-proof red cedar chests—a necessity in every home.

OUTSIDE MEASURE

R 2960—Panel	20	inches	high,	20	inches	wide,	36	inches	long		$11.25
R 2961—	"	24	"	"	24	"	"	42	"	"	15.00
R 2962—	"	28	"	"	28	"	"	48	"	"	18.75
R 2963—	"	32	"	"	32	"	"	54	"	"	22.50

These chests are made of the best red cedar lumber, 1 inch and 1¼ inch thick, with good spring locks, heavy plate castors, strong bronzed handles, brass on corners of mouldings, and finished with the very best varnish to be obtained.

Above prices subject to discount.

LADDERS

R 2970

THE STANDARD

Is the best cheap ladder made.

Has heavier sides, legs and braces than any other.

Has malleable iron brackets joining top to sides and legs.

Has all four sides of sides, legs and braces of smooth finish.

We claim it is the best finished and strongest cheap ladder put on the market.

Bucket shelves can be put on if desired.

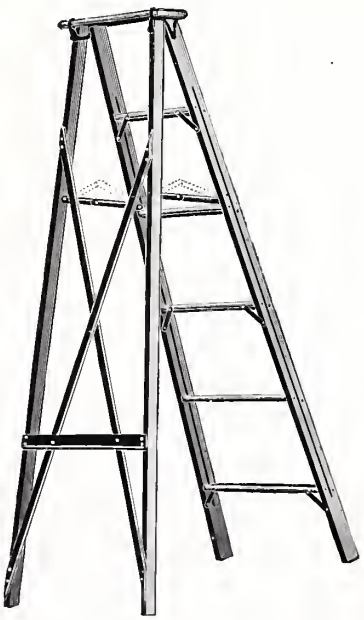
THE HOUSEHOLD

An excellent, moderate price ladder.

Made of sellected stock.

Has malleable iron brackets, double locking leg braces, and extra iron braces under steps.

It is very strong and well finished.



R 2971

Prices on application.

LADDERS

I. X. L STEP LADDER

R 2972

The best and strongest ladder manufactured.

Made from selected and extra heavy stock.

Has malleable iron brackets and leg hinges.

Has anchor irons under each step to prevent spreading.

Has patent truss braces on back of steps.

Has corner irons over end of each leg brace.

Has our new spreading brace to hold the legs.

This ladder is specially finished.

COMMON LONG LADDERS

R 2973

Made from the best of selected and seasoned lumber.

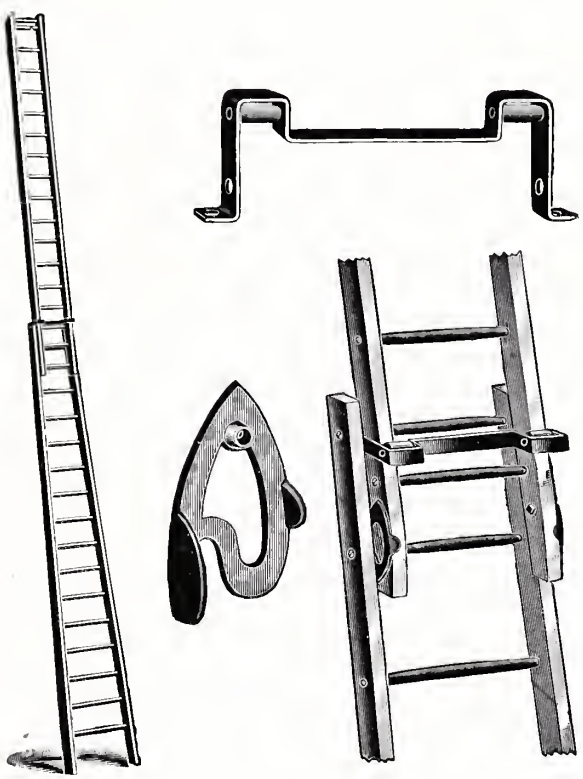
Hickory rungs, well fastened to sides and countersunk.

Finish is the best and stock the lightest.

Prices on application.

LADDERS

OUR NEW EXTENSION LADDER



PATENTED

R 2974

Made from selected and seasoned Norway pine, and hickory rungs. Our new double roller, single piece top iron is much stronger than two single rollers, and strengthens the ladder at its weakest place. Our hooks are also the best. This is the best extension ladder manufactured.

Prices on application.

Building Papers

We have an extensive line of building papers manufactured especially for our trade, and can ship promptly the following: Plain "Strawboard," "Tar Board," "Tar Felt," "Deadening Felt," Genuine "Red Rosin Sized," 3-ply and solid, also "Cedar Carpet Lining," "Corrugated Carpet Lining," "Parchment," and "Black Diamond Roofing."

We desire to state that our "Red Rosin Sized" Papers are without exception the best on the market, and, when the weight is taken into consideration, we will guarantee our prices to be as low as can be had anywhere.

Black Diamond Roofing

TWO AND THREE PLY

We carry a large stock of this prepared roofing, and can recommend it as the cheapest and best roof for buildings of any description. Each roll will cover 100 square feet, and enough asphaltum cement, tin caps and roofing nails is furnished to put same in place on the roof.

If you have not already received samples of our "Red Rosin Sized Papers" and "Black Diamond Roofing," kindly advise, and we will be pleased to forward them to you.

Send for net price list.

8312	4.00	8350	5.00	8388	5.00	8426	7.50		

IMPORTANT NOTICE.

When moulding is priced by the inch *it is in all cases understood* that the price is based on ripping width of lumber, that is: ¼ *of an inch wider than the finished size* of moulding. For example A ⅞ inch thick panel moulding if made to finish 1¾ inch wide would be charged as 2 inches (being ripping size); to finish full 2 inches, would be charged as 2¼ inch, etc.

Approximate weight of Mouldings, 1x1 inch, per 100 lineal feet, 15 pounds.
